Introduction

Welcome to Copying the "FACTS" - A Math Copywork Book! Over the years of homeschooling, I have tried numerous ways to help my children memorize their math facts. Some have seemed to work, others have not. Using the copywork methods of Charlotte Mason, I decided to give Math copywork a try! If my children could learn writing, spelling, and grammar using copywork of "words", why couldn't they learn their math facts by copying the "facts"?

This ebook covers all of the addition, subtraction, and multiplication facts (0-10). I decided to not include division, because in my opinion if your children have the multiplication facts memorized they will have no problem dividing. Each page contains a set of facts to be copied over and over until they are mastered. Copywork allows your children to copy and see the correct answers only ...which will hopefully cut down on any wrong answers being engrained in their minds. Now...how to use this ebook...

How to Use this eBook:

1. I would suggest doing one copywork page a day, repeating the same "fact" page until the facts on that page are mastered.
2. Have your child simply copy the math problem and answer in the space next to each problem.

3. Continue copying this same page (just print out a new page each day) until your child thinks he has them memorized.
4. Give an oral test of the facts for that page. This can be done by just saying the problems out loud and having your child tell you the answer OR you can use the flashcards provided at the end of this ebook. Simply print out the flashcards onto white cardstock paper and cut out with a paper cutter.
5. If your child does well on the test, then move on to the next "fact" page.
6. I have provided a check-off chart entitled, "Facts I Have Mastered" if you would like a chart to show your child's progress. Simply check off each fact page as they are mastered or use stickers for younger children!
7. It would be a good idea to review previous "facts" after each new "fact" page is mastered. Use the flashcards to review previously learned facts.

Have fun learning math facts together...through copywork!

In Christ,
Sheri
